**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claim 2 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 6.
6. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Claims 2 and 6 are exact duplicate of one another, it is suggest that one of the claims be cancelled.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pater (US 5,878,437) in view of Ragone et al. (US 4,055,855). Pater discloses a hospital gown (10) including a main body (14) that extends from the neck to the knees, having an upper section, a bottom edge, a left side terminating in a first edge and a right side terminating in a second edge. Further, the gown defines a front side and a back side with a gap

Art Unit: 3765

between the left and right side extending down the back side from the neck to the knee as shown in figure 1. Also, the gown includes a pair of sleeves (16) joined to the upper second of the main body and a collar is formed by the main body portion and the sleeves defining a neck opening having a gap on the back side between the left and right sides as shown in figure 2. Also, a plurality of mating hooks and loop fastener strips are attached to the overlapping first and second edges and are spaced from the collar to the bottom edge, col. 5, lines 31-67 and a shown in figure 1. However, Pater does not show first and second releasable ties extending from left and right sides of the collar.

Ragone et al (hereinafter Ragone) discloses a hospital gown including first and second releasable ties (22,24) extending from left and right sides of the collar as shown in figure 1.

It would have been obvious to one skilled in the art at the time the invention was made to provide the collar of Pater with first and second releasable ties extending from left and right sides thereof as taught by Ragone, so that the gown is properly secured about the neck and the body when worn.

With regard to claims 2 and 6, it would have been obvious to one skilled in the art that sleeves and the main body of the gown can be made of any desired material that was available at the time the device was made.
